February 1, 2017

The California Board for Professional Engineers, Land Surveyors and Geologists (BPELSG) is undertaking a comprehensive research project of the civil engineering profession referred to as an Occupational Analysis. You are invited to participate in an online survey that will validate the tasks and knowledge that are important to the work performed by civil engineering professionals as it applies to the definition of civil engineering and authority to practice in California.

The results of the study will be used to update the California Civil Engineering Surveying and Civil Seismic Principles examinations and will also provide BPELSG with valuable information regarding the work performed by civil engineering professionals.

The Occupational Analysis is completed every five to seven years and is the source for determining the content of the licensing examinations. This analysis is an essential step in keeping the civil engineering examinations current and practice related.

Your participation is critical to ensuring the success of the study. As part of this study, we need your assistance in completing an online survey. The survey will take approximately 45 minutes to complete and can be saved and completed in multiple sessions.

INSTRUCTIONS FOR PARTICIPATION:

[Please click here to take the survey.](#)

The following contact information is provided if you encounter any technical difficulties with completing the survey online or have questions regarding the survey content. Please be sure to identify the survey you are taking (California Civil Engineer Occupational Analysis 2016). Email: julie.morby@prometric.com or Telephone: (801) 541-9738. You will receive a response within 24 hours, Monday through Friday (except holidays).

Your completed survey should be submitted on/by February 28, 2017 (11:59 PM PST).

Thank you in advance for your participation in this survey and ongoing support of the program.
