March 28, 2017

The California Board for Professional Engineers, Land Surveyors, and Geologists (BPELSG) is undertaking a comprehensive research project of the traffic engineering profession referred to as an Occupational Analysis. Licensed Traffic Engineers are invited to participate in an online survey that will validate the tasks and knowledge that are important to the work performed by traffic engineering professionals as it applies to the definition of traffic engineering and authority to practice in California.

The results of the study will be used to update the California Traffic Engineering examination and will also provide BPELSG with valuable information regarding the work performed by traffic engineering professionals. The Occupational Analysis is completed every five to seven years and is the source for determining the content of the licensing examinations. This analysis is an essential step in keeping the traffic engineering examination current and practice-related.

Your participation is critical to ensuring the success of the study. As part of this study, we need your assistance in completing an online survey. Please consider filling out the survey that takes approximately 25 minutes to complete and can be saved and completed in multiple sessions.

**INSTRUCTIONS FOR PARTICIPATION:**

Please click below to take the survey.

If you encounter any technical difficulties with completing the survey online or have questions regarding the survey content, you may contact Julie Morby at Prometric. Please be sure to identify the survey you are taking as the “California Traffic Engineer Occupational Analysis 2017.” Email: [julie.morby@prometric.com](mailto:julie.morby@prometric.com) or Telephone: (801) 541-9738. You will receive a response within 24 hours, Monday through Friday (except holidays).

**Your completed survey should be submitted on or before **May 19, 2017 (11:59 PM PST)**.**

Thank you for your participation in this survey and ongoing support of the program.
